About Me

Who Is Mohammed Fairoos?

I'm Mohammed Fairoos, a UI/UX designer with a passion for intuitive solutions and seamless interactions. My core strengths lie in mobile app design, web interfaces, prototyping, wireframing, and frontend development.

I start by understanding user needs, sketching concepts, and rapidly iterating through prototypes, then bring those ideas into the browser with clean, responsive code. My goal is to bridge the gap between design and implementation, crafting experiences that work beautifully for people and performance.
